

SAFETY DATA SHEET

Version 1.4
Revision Date 01.07.2021

SDS Number 300000000021
Print Date 05.03.2022

1. IDENTIFICATION OF THE SUBSTANCE/MIXTURE AND THE COMPANY/UNDERTAKING

Identification of the substance/preparation : Carbon dioxide (Refrigerated)

Chemical formula : CO₂

Other means of identification : Carbon dioxide (refrigerated)

Use of the Substance/Mixture : General Industrial., Extinguishing agent. Industrial and professional use.

Restrictions on Use : No data available.

Manufacturer/Importer/Distributor : Air Products Singapore Industrial Gases Pte. Ltd.
2 International Business Park
The Strategy, #03-20
Singapore 609930
Toll Free No: 800 448 1755

Email Address – Technical Information : GASTECH@airproducts.com

Telephone : 6332 2440

Emergency telephone number (24h) : +65 6853 6800
+1 610 481 7711 International

2. HAZARDS IDENTIFICATION

GHS classification
Gases under pressure - Refrigerated liquefied gas.

GHS label elements
Hazard pictograms/symbols

Signal Word: Warning

Hazard Statements:

H281: Contains refrigerated gas; may cause cryogenic burns or injury.

Precautionary Statements:

Prevention : P282: Wear cold insulating gloves/face shield/eye protection.

SAFETY DATA SHEET

Version 1.4
Revision Date 01.07.2021

SDS Number 300000000021
Print Date 05.03.2022

Response : P315 :Get immediate medical advice/attention.
P336 :Thaw frosted parts with lukewarm water. Do not rub affected area.

Storage : P403:Store in a well-ventilated place.

Other hazards which do not result in classification

May increase respiration and heart rate.
Extremely cold liquid and gas under pressure.
Direct contact with liquid can cause frostbite.
Can cause rapid suffocation.
Avoid breathing gas.
Self-contained breathing apparatus (SCBA) may be required.

3. COMPOSITION/INFORMATION ON INGREDIENTS

Substance/Mixture : Substance

Components	Chemical formula	CAS Number	Concentration (Weight)
Carbon Dioxide	CO2	124-38-9	100 %

Concentration is nominal. For the exact product composition, please refer to technical specifications.

4. FIRST AID MEASURES

General advice : Remove victim to uncontaminated area wearing self-contained breathing apparatus. Keep victim warm and rested. Call a doctor. Apply artificial respiration if breathing stopped.

Eye contact : In the case of contact with eyes, rinse immediately with plenty of water and seek medical advice.
In the case of contact with eyes, rinse immediately with plenty of water and seek medical advice.
Keep eye wide open while rinsing.

Skin contact : In case of frostbite spray with water for at least 15 minutes. Apply a sterile dressing. Seek medical advice. In case of frostbite, obtain medical treatment immediately. As soon as practical, place the affected area in a warm water bath - which has a temperature not to exceed 40 °C (105 °F). Do not rub frozen parts as tissue damage may result. Cover wound with sterile dressing.

Ingestion : Ingestion is not considered a potential route of exposure.

Inhalation : Move to fresh air. If breathing has stopped or is labored, give assisted respirations. Supplemental oxygen may be indicated. If the heart has stopped, trained personnel should begin cardiopulmonary resuscitation immediately. In case of shortness of breath, give oxygen.

Symptoms : Shivering fit. Sweating. Blurred vision. Headache. Increased pulse rate. Shortness of breath. Rapid respiration. Frostbite. Exposure to oxygen deficient atmosphere may cause the following symptoms: Dizziness. Salivation. Nausea. Vomiting. Loss of mobility/consciousness.

SAFETY DATA SHEET

Version 1.4
Revision Date 01.07.2021

SDS Number 300000000021
Print Date 05.03.2022

Notes to physician

Treatment : If exposed or concerned: Get medical attention/advice.

5. FIRE-FIGHTING MEASURES

- Suitable extinguishing media : The product itself does not burn.
Use extinguishing media appropriate for surrounding fire.
- Extinguishing media which must not be used for safety reasons. : Do not use water jet to extinguish.
- Specific hazards : Spill will rapidly vaporize forming an oxygen deficient vapor cloud. Vapor cloud may obscure visibility. Do not direct water spray at container vent. Move away from container and cool with water from a protected position. Keep containers and surroundings cool with water spray.
- Special protective equipment for fire-fighters : Wear self contained breathing apparatus for fire fighting if necessary. Standard protective clothing and equipment (Self Contained Breathing Apparatus) for fire fighters. Standard EN 137 - Self-contained open-circuit compressed air breathing apparatus with full face mask. Standard EN 469 - Protective clothing for firefighters. Standard - EN 659: Protective gloves for firefighters.

6. ACCIDENTAL RELEASE MEASURES

- Personal precautions : Monitor carbon dioxide level. Evacuate personnel to safe areas. Ventilate the area. Monitor oxygen level. Wear self-contained breathing apparatus when entering area unless atmosphere is proved to be safe.
- Environmental precautions : Prevent further leakage or spillage. Prevent from entering sewers, basements and workpits, or any place where its accumulation can be dangerous. Do not discharge into any place where its accumulation could be dangerous.
- Methods for cleaning up : Ventilate the area.
- Additional advice : If possible, stop flow of product. Increase ventilation to the release area and monitor oxygen level. Vapor cloud may obscure visibility. Do not spray water directly at leak. If leak is from cylinder or cylinder valve, call the emergency telephone number. If the leak is in the user's system, close the cylinder valve and safely vent the pressure before attempting repairs.

7. HANDLING AND STORAGE

Handling

Containers, which contain or have contained flammable or explosive substances, must not be inerted with liquid carbon dioxide. Potential production of solid CO₂ particles must be ruled out. In order to rule out potential electrostatic discharge production, the system must be adequately grounded. Be aware of the risk of formation of static electricity with the use of CO₂ extinguishers and do not use them in places where a flammable atmosphere may be present. Know and understand the properties and hazards of the product before use. Only experienced and properly instructed persons should handle compressed gases/cryogenic liquids. Before using the product, determine its identity by reading the label. Do not remove or deface labels provided by the supplier for the identification of the cylinder contents. Before connecting the container, check the complete gas system for

SAFETY DATA SHEET

Version 1.4
Revision Date 01.07.2021

SDS Number 300000000021
Print Date 05.03.2022

suitability, particularly for pressure rating and materials. Before connecting the container for use, ensure that back feed from the system into the container is prevented. Close container valve after each use and when empty, even if still connected to equipment. Never attempt to repair or modify container valves or safety relief devices. Damaged valves should be reported immediately to the supplier. If user experiences any difficulty operating cylinder valve discontinue use and contact supplier. Do not remove or interchange connections. Ensure the complete gas system has been checked for leaks before use. Prevent entrapment of cryogenic liquid in closed systems not protected with relief device. A small quantity of liquid produces large volumes of vaporized gas at atmospheric pressure. Containers used in shipment, storage, and transfer of cryogenic liquid are specially designed, well-insulated containers equipped with a pressure relief device and valves to control pressure. Under normal conditions, these containers will periodically vent product to limit pressure buildup. Ensure that the container is in a well-ventilated area to avoid creating an oxygen-deficient atmosphere. Use adequate pressure relief in systems and piping to prevent pressure buildup; liquid in a closed container can generate extremely high pressures when vaporized by warming. Employ suitable pressure regulating devices on all containers when the gas is being emitted to systems with lower pressure rating than that of the container. Only transfer lines designed for cryogenic liquids shall be used. Do not subject containers to abnormal mechanical shock. When moving cylinders, even for short distances, use a cart (trolley, hand truck, etc.) designed to transport cylinders. When doubt exists as to the correct handling procedure for a particular gas, contact the supplier.

Storage

Do not allow storage temperature to exceed 50°C (122°F). Containers should be stored in a purpose build compound which should be well ventilated, preferably in the open air. Full containers should be stored so that oldest stock is used first. Do not store in a confined space. Full and empty cylinders should be segregated. Store containers in location free from fire risk and away from sources of heat and ignition. Return empty containers in a timely manner. Stored containers should be periodically checked for general condition and leakage. Protect containers stored in the open against rusting and extremes of weather. Containers should not be stored in conditions likely to encourage corrosion. Cryogenic containers are equipped with pressure relief devices to control internal pressure. Under normal conditions these containers will periodically vent product. All vents should be piped to the exterior of the building. Observe all regulations and local requirements regarding storage of containers.

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

Engineering measures

Provide natural or mechanical ventilation to prevent accumulation above exposure limits.
Natural or mechanical to prevent oxygen deficient atmospheres below 19.5% oxygen.
Keep self-contained breathing apparatus readily available for emergency use.

Personal protective equipment

- | | |
|------------------------|--|
| Respiratory protection | : Self contained breathing apparatus (SCBA) or positive pressure airline with mask are to be used in oxygen-deficient atmosphere.
Air purifying respirators will not provide protection. Users of breathing apparatus must be trained. |
| Hand protection | : Wear work gloves when handling gas containers.
Standard EN 388 - Protective gloves against mechanical risk.
If the operation involves possible exposure to a cryogenic liquid, wear loose fitting thermal insulated or cryo-gloves.
Standard EN 511 - Cold insulating gloves. |
| Eye protection | : Safety glasses recommended when handling cylinders.
Protect eyes, face and skin from liquid splashes.
Wear goggles and a face shield when transfilling or breaking transfer |

SAFETY DATA SHEET

Version 1.4
Revision Date 01.07.2021

SDS Number 300000000021
Print Date 05.03.2022

connections.
Standard EN 166 - Personal eye-protection.

Skin and body protection : Never allow any unprotected part of the body to touch uninsulated pipes or vessels which contain cryogenic fluids. The extremely cold metal will cause the flesh to stick fast and tear when one attempts to withdraw from it.
Safety shoes are recommended when handling cylinders.
Standard EN ISO 20345 - Personal protective equipment - Safety footwear.

Special instructions for protection and hygiene : Ensure adequate ventilation, especially in confined areas.

Exposure limit(s)

Carbon Dioxide	Time Weighted Average (TWA): EH40 WEL	5,000 ppm	9,150 mg/m3
Carbon Dioxide	Short Term Exposure Limit (STEL) EH40 WEL	15,000 ppm	27,400 mg/m3

Remarks : Simple asphyxiant.

9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance : Refrigerated liquefied gas. Colorless.

Odor : No odor warning properties.

Odor threshold : No data available.

pH : 3.7

Melting point/range : -70 °F (-56.6 °C)

Boiling point/range : No data available.

Flash point : Not applicable.

Evaporation rate : Not applicable.

Flammability (solid, gas) : Refer to product classification in Section 2

Upper/lower explosion/flammability limit : No data available.

Vapor pressure : 831.04 psia (57.30 bara) at 68 °F (20 °C)

Water solubility : 2.000 g/l

Relative vapor density : 1.519 (air = 1) Heavier than air.

Relative density : 0.82 (water = 1)

Partition coefficient: n-octanol/water [log Kow] : Not applicable.

Auto-ignition temperature : No data available.

SAFETY DATA SHEET

Version 1.4
Revision Date 01.07.2021

SDS Number 300000000021
Print Date 05.03.2022

Decomposition temperature	: No data available.
Viscosity	: 0.07 mPa.s at 68 °F (20 °C)
Molecular Weight	: 44.01 g/mol
Density	: 0.112 lb/ft3 (0.0018 g/cm3) at 70 °F (21 °C) Note: (as vapor)
Sublimation point	: -109 °F (-78.5 °C)

10. STABILITY AND REACTIVITY

Chemical Stability	: Stable under normal conditions.
Conditions to avoid	: Direct sources of heat.
Reactivity/Incompatible Materials	: Bases. Powdered metals. Materials such as carbon steel, low alloy carbon steel and plastic become brittle at low temperatures and are subject to failure. Use appropriate materials compatible with the cryogenic conditions present in refrigerated liquefied gas systems.
Hazardous decomposition products	: Under normal conditions of storage and use, hazardous decomposition products should not be produced.

11. TOXICOLOGICAL INFORMATION

Likely routes of exposure

Effects on Eye	: Contact with liquid may cause cold burns/frostbite.
Effects on Skin	: Contact with liquid may cause cold burns/frostbite. May cause severe frostbite.
Inhalation Effects	: Concentrations of 10% CO ₂ or more can produce unconsciousness or death. Unlike simple asphyxiants, carbon dioxide has the ability to cause death even when normal oxygen levels (20-21%) are maintained. Carbon Dioxide is physiologically active, affecting circulation and breathing. At concentrations between 2 and 10%, carbon dioxide can cause nausea, dizziness, headache, mental confusion, increased blood pressure and respiratory rate. In high concentrations may cause asphyxiation. Symptoms may include loss of mobility/consciousness. Victim may not be aware of asphyxiation. Asphyxiation may bring about unconsciousness without warning and so rapidly that victim may be unable to protect themselves.
Ingestion Effects	: Ingestion is not considered a potential route of exposure.
Symptoms	: Exposure to oxygen deficient atmosphere may cause the following symptoms: Dizziness. Salivation. Nausea. Vomiting. Loss of mobility/consciousness. Shivering fit. Sweating. Blurred vision. Headache. Increased pulse rate. Shortness of breath. Rapid respiration. Frostbite.

SAFETY DATA SHEET

Version 1.4
Revision Date 01.07.2021

SDS Number 300000000021
Print Date 05.03.2022

Acute toxicity

- Acute Oral Toxicity : No data is available on the product itself.
- Inhalation : Unlike simple asphyxiants, carbon dioxide has the ability to cause death even when normal oxygen levels (20-21%) are maintained. 5% CO₂ has been found to act synergistically to increase the toxicity of certain other gases (CO, NO₂). CO₂ has been shown to enhance the production of carboxy- or met-hemoglobin by these gases possibly due to carbon dioxide's stimulatory effects on the respiratory and circulatory systems.
- Acute Dermal Toxicity : No data is available on the product itself.
- Serious eye damage/eye irritation : No data available.
- Sensitization. : No data available.

Chronic toxicity or effects from long term exposures

- Carcinogenicity : No data available.
- Reproductive toxicity : No data is available on the product itself.
- Germ cell mutagenicity : No data is available on the product itself.
- Specific target organ systemic toxicity (single exposure) : No data available.
- Specific target organ systemic toxicity (repeated exposure) : No data available.
- Aspiration hazard : No data available.

12. ECOLOGICAL INFORMATION

Ecotoxicity effects

- Aquatic toxicity : Not applicable.
- | | | |
|-------------------------------|-----------------------|--|
| Toxicity to fish - Components | | |
| Carbon Dioxide | LC50 (1 h) : 240 mg/l | Species : Rainbow trout (Oncorhynchus mykiss). |
| Carbon Dioxide | LC50 (96 h) : 35 mg/l | Species : Rainbow trout (Oncorhynchus mykiss). |
- Toxicity to other organisms : Not applicable.

SAFETY DATA SHEET

Version 1.4
Revision Date 01.07.2021

SDS Number 300000000021
Print Date 05.03.2022

Persistence and degradability

- Biodegradability : No data is available on the product itself.
- Mobility : Because of its high volatility, the product is unlikely to cause ground pollution.
- Bioaccumulation : Refer to Section 9 "Partition Coefficient (n-octanol/water)".

Further information

When discharged in large quantities may contribute to the greenhouse effect.

13. DISPOSAL CONSIDERATIONS

- Waste from residues / unused products : Return unused product in original cylinder to supplier. Contact supplier if guidance is required. Refer to the EIGA code of practice Doc. 30 "Disposal of Gases", downloadable at <http://www.eiga.org> for more guidance on suitable disposal methods. List of hazardous waste codes: 16 05 05: Gases in pressure containers other than those mentioned in 16 05 04.
- Contaminated packaging : Return cylinder to supplier.

14. TRANSPORT INFORMATION

ADR

- UN/ID No. : UN2187
- Proper shipping name : CARBON DIOXIDE, REFRIGERATED LIQUID
- Class or Division : 2
- Tunnel Code : (C/E)
- Label(s) : 2.2
- ADR/RID Hazard ID no. : 22
- Marine Pollutant : No

IATA

- UN/ID No. : UN2187
- Proper shipping name : Carbon dioxide, refrigerated liquid
- Class or Division : 2.2

Further Information

Avoid transport on vehicles where the load space is not separated from the driver's compartment. Ensure vehicle driver is aware of the potential hazards of the load and knows what to do in the event of an accident or an emergency. The transportation information is not intended to convey all specific regulatory data relating to this material. For complete transportation information, contact customer service.

15. REGULATORY INFORMATION

Workplace Safety and Health Act & Workplace Safety and Health (General Provisions) Regulations

Workplace Health and Safety Act , SS586 Labeling.

Country	Regulatory list	Notification
USA	TSCA	Included on Inventory.
EU	EINECS	Included on Inventory.
Canada	DSL	Included on Inventory.
Australia	AICS	Included on Inventory.
Japan	ENCS	Included on Inventory.
South Korea	ECL	Included on Inventory.
China	SEPA	Included on Inventory.
Philippines	PICCS	Included on Inventory.

16. OTHER INFORMATION

Ensure all national/local regulations are observed.
